

DECCA

Kane
PORTFOLIO

Kane Portfolio is designed to create adaptable, integrated workspaces that function beautifully in today's office. Classic non-handed components allow for a choice of worksurface and storage configurations, a level of flexibility that is further enhanced by a unique independent worktable that does not rely on a pedestal or credenza for support. Overlapping surfaces and multi-use components address the constraints of smaller spaces. A unique raceway system delivers power and communications to the worksurface, without compromising flexibility, ease of installation or the clean aesthetic of the collection. Kane Portfolio exemplifies Decca's reputation for superior design, craft and quality.

Office configuration consisting of 15 Deep Freestanding Tower, 24 Deep Credenza, High Hutch with natural cork tack panel, 25 High Storage Credenza with solid surface inset top and 30 Deep Table Desk, shown in rift cut Oak.
