Natural characteristics will include tree growth markings, discolorations and grain pattern inconsistencies. DECCA is not responsible for natural variations.

**FINISHES**

The DECCA finishing process is a unique procedure that has been specifically designed for DECCA. Each product goes through a 27-step process that is designed to provide an elegant aesthetic appearance and a high level of durability. The multiple sanding and oven drying procedures create a rich color and patina while the modified polyurethane topcoat protects the worksurfaces from daily wear and tear.

**WOOD CARE AND MAINTENANCE**

The finishing process used by DECCA ensures a durable finish on all our products. Dust only with a clean, dry cloth, going with the grain. Clean any marks with a damp cloth, using a small quantity of mild soap or detergent. Do not use any waxbased polish, petroleum based sprays or silicone. Do not place your furniture in a position of permanent exposure to direct sunlight.

Wood is a natural product with inherent color variations, the finishing process will never fully mitigate those variations. Please anticipate variation in colors within a single unit, or from piece to piece. DECCA wood finish samples will also exhibit variations. If a strict color match is required, a sample must be supplied with the order and an upcharge may apply. Exact color matches will not be possible.
