

DECCA

INDEXLT™

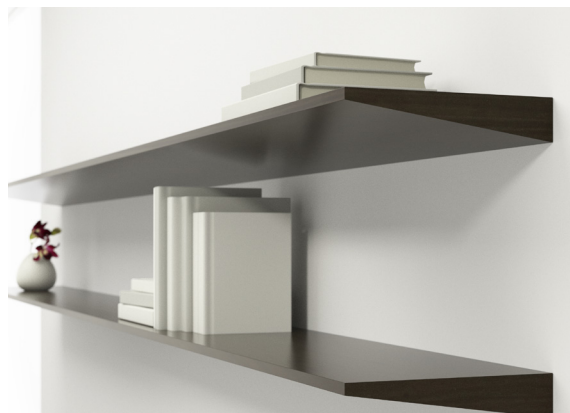

Decca introduces Index LT™, an evolution of the classic Index casegoods collection. Designed as a response to the new emphasis on furniture that is lighter in scale with a leaner visual presence, IndexLT is more about line than mass, tailored to a modern workplace that's about less real estate and greater agility. At the same time, IndexLT retains the superb level of craft and high quality veneers that distinguish the familiar Index line with its curated styling and refined details. IndexLT is a simple, straightforward furniture solution with layered surfaces and well considered storage that allow you to create a complete, unified landscape that is both beautiful and efficient.

Work surfaces overlap storage pedestals creating layered design solutions. Shown in Natural Oak with Soft White Lacquer and Brushed Stainless Steel.

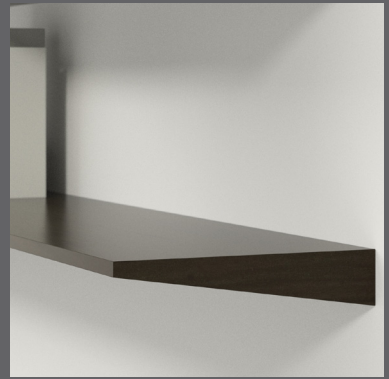

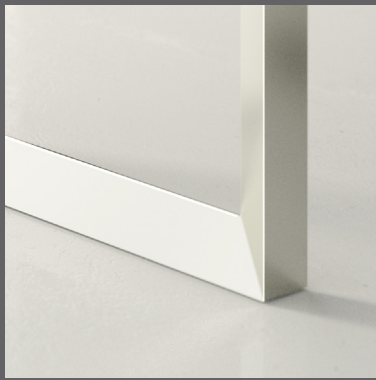

Wall mounted wood shelves establish a strong linear presence.
Shown in Sorel Walnut.

IndexL™ is finely crafted wood casegoods, offering distinctive finish options for creating understated or dramatic design statements. Shown in Sable Walnut with Opaque Gray Glass and Brushed Stainless Steel.
